

**TRANSPORTATION SPEND MANAGEMENT + BUSINESS INTELLIGENCE**

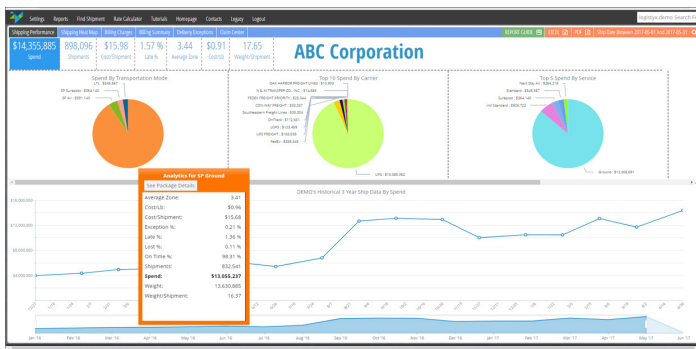

# Global Transportation Audit + Analytics Engine

Logistyx Audit saves our clients time and money by combining and auditing all modes of transportation carrier invoices plus shipping system manifest data together into one consolidated platform. Our solution provides our customers with greater insight into transportation metrics than what carriers provide, delivering valuable information for decision making, enhanced customer service, better transportation cost controls and spend management, as well as improved results from contract negotiations.

## REDUCE SHIPPING COSTS

Logistyx Audit is a web-based, intuitive dashboard solution, backed by a sophisticated data engine, to present a comprehensive view of detailed transportation activities and costs. Our data engine analyzes every shipment, identifies and confirms credits with your carriers, and electronically delivers an adjusted bill for payment. Our system audits invoices across all modes of transportation including small parcel, LTL, TL, air, and ocean.

Logistyx Audit matches manifest (expected) shipment transactions with carrier billing data (actual) in one data set, providing your company with proactive insight to identify, target, and reduce transportation costs.

The Logistyx Audit dashboard makes it easy to select key parameters to monitor costs, carrier performance and more. Users can choose to view summary data or drill down for specific shipment or carrier detail by pointing and clicking on many user-defined elements.

## IMPROVE SUPPLY CHAIN VISIBILITY

As an aggregator of all carrier invoices, Logistyx Audit turns our client's data into real information improving visibility into their supply chains. This includes tools for track and trace, delivery

exception monitoring, and event management to help you drive a customer facing, service-based competitive advantage.

## ANALYTICS + BUSINESS INTELLIGENCE

Visualize and leverage complex, real-time data

- Single data repository brings your data into common alignment across your organization
- Reports to monitor KPIs and perform scorecarding
- Attractive, customizable dashboards for internal or external use
- Heat maps to drive geographical analysis
- Trend analysis to monitor KPIs over periods of time

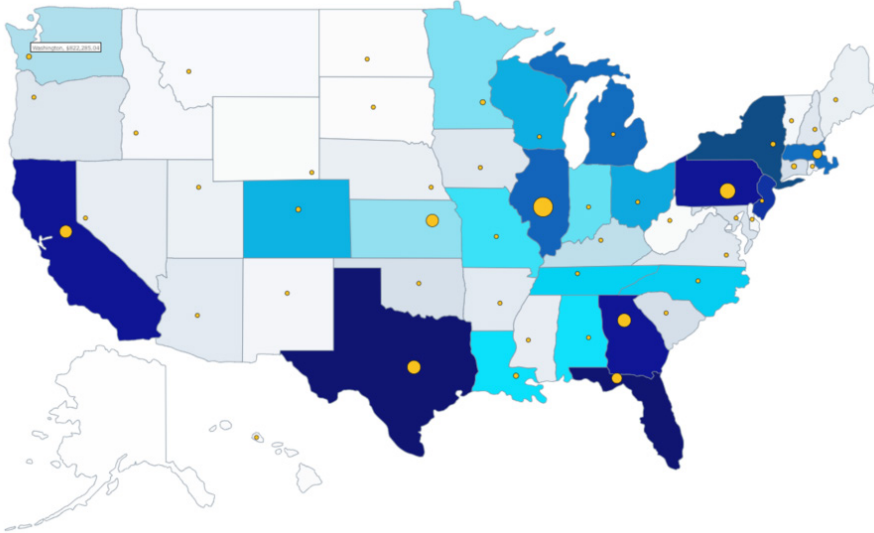

## FREIGHT AUDIT + RECOVERY

Our systematic audit process monitors 150+ data points across all modes of transportation including:

- Carrier contract compliance
- Residential surcharges
- Dimensional rates
- Address corrections (through address validation)
- Accessorial charges
- Duplicate billing
- Late packages
- Lost and damaged packages
- Difference between manifested vs. billed weights
- Manifested but not shipped

## FINANCE AND ACCOUNTING TOOLS

- Effectively manage complex GL coding and cost center allocation
- Accurately categorize costs by geography, business unit, or even SKU-level
- Track all unbilled carrier activity and detailed cost accruals
- Model total landed transportation costs and compare to estimates

Logistyx Audit also provides geography-based heat maps that make it easy to view delivery metrics at the country, state or county level, to track KPIs such as on-time vs. late delivery, average delivery costs, transit times and more.

## CONTRACT OPTIMIZATION

- Benchmark against like-shippers to estimate carrier cost-to-serve and margin to maximize savings
- Analyze carrier contracts and uncover cost reduction opportunities
- Optimize your entire supply chain through a holistic view to improve transit time, lower costs, and improve customer satisfaction through optimal carrier and service selection
- Model and forecast total landed transportation costs and compare to estimates

## RAPID IMPLEMENTATION FOR RAPID ROI

Logistyx Audit can be implemented quickly with minimal resource requirements from your IT staff. Logistyx Audit is already integrated with many different financial, ERP and transportation systems, and is connected to more than 3,000 global carrier services so that you can be up and running in no time.

## KEY BENEFITS

- Fully configurable, secure and cloud-based solution
- Systematically initiate recovery where discrepancies are found
- Improved visibility of actual vs. forecasted transportation costs
- Tactical application of spend strategies
- Rapid implementation and ROI
- Proven significant cost reductions
- Efficiency improvements without revolutionary process change
- Centralize analysis and management of all shipping activity
- Visibility of all carriers through single web portal
- Spend recovery rate: 1.5% - 5%
- Streamlined carrier invoice payment processes
- Accounts payable integration including consolidated invoices
- Optimized routing based using our rate-shopping engine with your contract rates
- Monitor internal shipping compliance with inbound and outbound routing guidelines
