

TRANSPORTATION SPEND MANAGEMENT & BUSINESS INTELLIGENCE

Improve Receiving Operations with Measure-IT

To control costs in today's dynamic fulfillment world, companies need a faster, easier way to capture and upload SKU-level product details into their supply chain planning and execution systems.

With Measure-IT, users scan, verify and upload product information in a fraction of the time it takes to manually weigh, measure and key in the same details.

Measure-IT accurately measures regular and irregular shaped packaging such as cartons, bags, tubes and other packaging. Here's how Measure-IT works. Your staff:

1. Scans the product ID and places the product on the Measure-IT platform.
2. Measure-IT captures the item's weight and dimensions, snaps a photo, and stores the data in a file.
3. Product characteristics are shown on-screen for visual guidance of workflow.
4. The product file can be exported and uploaded to your WMS and other host systems for planning purposes.

ELIMINATE MANUAL DATA INPUT AND IMPROVE ACCURACY

No more keying in product details as inventory is received. With Measure-IT, users scan, verify and upload product information in a fraction of the time it takes to manually weigh, measure and key in the same details.

Data entry errors are also eliminated. You gain more detailed, accurate product data while increasing productivity and freeing up staff to work on other tasks.

Current Shipment (Package 1 of 1)			
SKU / Item Number	CP06211956		
Package Type	Loose		
Weight	0.35		
Length	5.1875		
Width	2.875		
Height	1.5		
Dim Weight	.13		
Volume	22.371		
Date	4/21/2016		
Warehouse ID	ADSI Chicago		
System Mode	Dimensioning Mode

FLEXIBLE CONFIGURATION

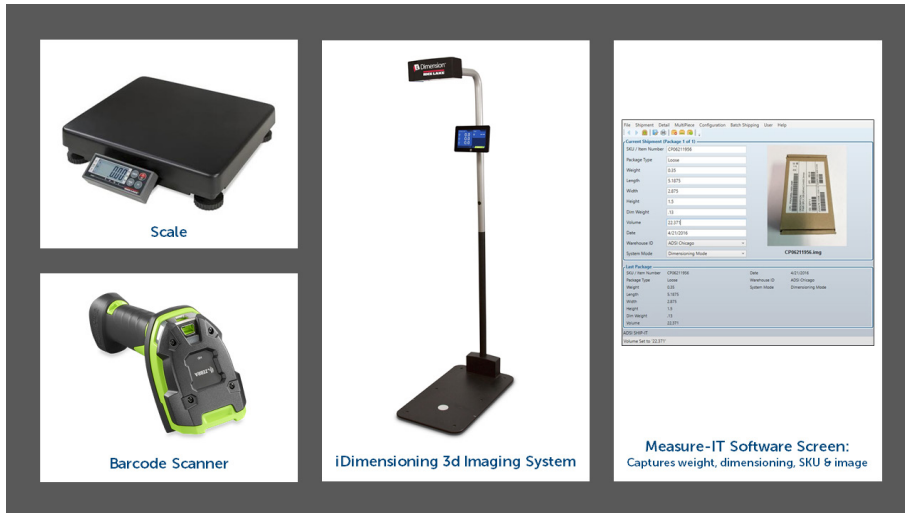

You can configure Measure-IT for your specific operations, specifying units of measure, product description fields, serial numbers, secondary item identifiers, etc. A broad menu of user definable fields is provided.

Measure-IT also includes intuitive data mapping templates to simplify the importing and exporting of data files into spreadsheets, and/or your other databases or host systems.

IMPROVE PLANNING AND DECISION MAKING FROM RECEIVING TO SHIPPING

With Measure-IT, you can capture detailed product characteristics and easily improve operations in multiple ways:

- Build a more detailed product master file for inventory management.
- Enhance your inventory planning system for more efficient put away and space utilization.
- Support your cartonization software for more efficient order packing.
- Pass dimensions and weights of shippable items to your shipping software system for accurate shipment and rate calculations.

MEASURE-IT'S ALL-IN-ONE SOLUTION INCLUDES:

- Data capture software
- Scale
- Barcode Scanner
- Dimensioning system
- Digital camera

*All configured to digitally capture accurate product details in seconds.
