

STREAMLINE LARGE SHIPMENTS FOR EFFICIENT WORKFLOW

Stage-IT Shipment Consolidation Software

SMART, SIMPLE FREIGHT CONSOLIDATION

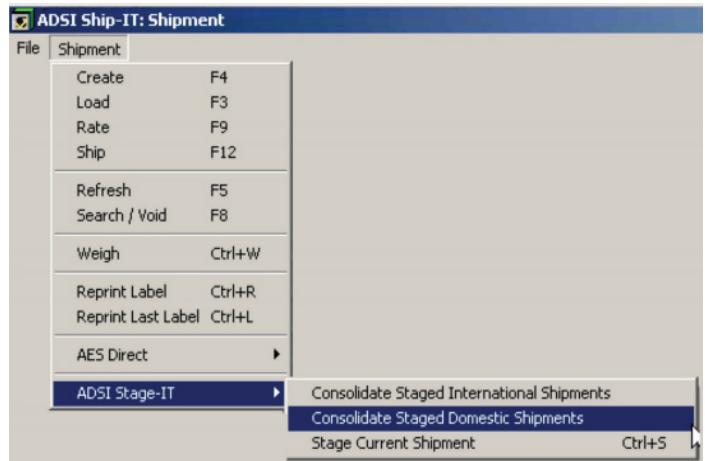

Consolidating shipments is easier when you add Stage-IT to your shipping operations. Stage-IT is a flexible software solution that enables you to proactively plan for consolidated shipments as they process the day's orders.

REAL-TIME DETECTION OF CONSOLIDATION OPPORTUNITIES

Stage-IT is installed as an integrated solution that receives order and inventory data from the host ERP and supply chain systems.

- As orders are received from the host system, Stage-IT analyzes them and identifies shipments eligible for consolidation.
- Orders and shipments are identified by a unique barcode, which is scanned as orders are processed for shipping. Stage-IT identifies shipments that are part of a larger consolidation and sends an alert to the staff to divert those shipments to the appropriate staging area.
- Once Stage-IT receives all shipments that are part of a consolidated order, it closes the order and automatically sends the order to Ship-IT™ to be processed.

Stage-IT is installed as an integrated solution that receives order and inventory data from the host ERP and supply chain systems.

Shippers can achieve even greater control over freight costs by adding Stage-IT to their Ship-IT multi-carrier system.

BENEFITS OF STAGE-IT CONSOLIDATION

- **More efficient workflow.** Eliminate the guesswork and inefficiencies associated with manually identifying and staging consolidated orders. Keeps workflow moving more efficiently.
- **Better control over freight costs.** Ensure that all consolidation opportunities are identified so the most cost-effective freight rates can be applied.
- **Streamlined customs clearance.** Consolidate shipments by country and by customer to expedite clearance process.
- **Fast, accurate preparation of shipment documents.** Stage-IT seamlessly passes all closed orders on to the Ship-IT module or automatic label and document generation.

CONFIGURATION OPTIONS

Stage-IT can be configured to exchange information with a wide range of host systems, including order entry, warehouse management, inventory and ERP systems.

Stage-IT also provides a flexible user screen that can be configured to match your specific needs.

Logistyx can install Stage-IT as a desktop or handheld solution on your existing hardware or our professional services team can recommend a complete, turn-key solution which includes hardware and software.
