

Ship-IT Multi-Carrier Parcel Shipping Software

Leverage the Power of a Multi-Carrier Shipping System and Increase Revenue per Shipment

Gain control over shipping costs with the Ship-IT™ multi-carrier parcel shipping software system. Ship-IT targets the problem areas that cause higher operational and freight costs and delivers real savings back to your bottom line.

COMPREHENSIVE MULTI-CARRIER CAPABILITIES

Ship-IT includes a flexible library of carrier-compliant routing and rating tools for small parcel, less-than-truckload (LTL), truckload (TL) and regional parcel carriers. You can automate carrier selection decisions for routing, rating, time-in-transit and much more:

Reduce Freight Costs: Instantly compare national and regional carriers for small parcel, LTL and TL shipments. Ensure that lowest-cost, on-time shipping rules are followed.

Increase Throughput: Automatically route, rate and process domestic and international shipments in a matter of seconds.

Automate Your Company's Shipping Scenarios: Embed company-specific business rules and customer preferences into the system to save time, prevent errors and eliminate manual shipping tasks.

Produce Shipping Labels and Documents in Seconds: Auto-generate carrier compliant labels and documents for domestic and export shipments. Automate AES Direct filing.

Enhance Visibility: Provide real-time delivery tracking details for customer shipments.

Share Information: Automatically capture shipping data for customer service and analysis.

Customize carrier rate shopping groups to meet your preferences. Automatically choose the best option for faster shipment processing or configure to rate shop manually.

FAST, ACCURATE AND EFFICIENT SHIPMENT PROCESSING

Ship-IT removes the manual, redundant processes that decrease shipping line speed and create errors. Flexible processing tools make it easy to ensure shipments are processed correctly, every time. Features include:

Address Verification Tools: Pre-emptively analyze and correct delivery address errors that result in upcharges.

Shipment Processing Rules: Built-in logic ensures only applicable services are considered, preventing users from choosing the wrong carrier, service and documents.

Customer-Specific Shipping Requirements: Routing instructions, reference data, specific label or document specifications, etc. can be embedded and triggered automatically for consignee-specific orders.

Comprehensive Document and Label Library: Access Ship-IT's library for pre-configured hazmat labels, commercial invoices, packing lists, and more—in a matter of seconds.

Ship-IT offers a wide range of carrier-compliant labels and other shipping documents, including ASNs, packing lists, export documents and more.

MULTIPLE IMPLEMENTATION OPTIONS

Ship-IT was designed with flexibility in mind, and is used by shippers of all sizes to meet a wide range of operational requirements:

- Desktop-based shipping
- Enterprise-wide solution
- SaaS-based solution
- Black box solution

PROFESSIONAL SERVICES FOR SOFTWARE AND HARDWARE

In addition to software, Logistyx also provides comprehensive implementation services. We have installed and configured our multi-carrier shipping software solutions to exchange information with a wide range of order management, warehouse management, ERP and other systems. With thousands of customer implementations under our belt, Logistyx has helped companies of all sizes address a wide range of shipping and other supply chain requirements.

REQUEST A DEMONSTRATION OF OUR COMPLETE SUITE OF SUPPLY CHAIN SOLUTIONS
